

# BHAVYA DAMANI

## Full-Stack Web Developer

bhavyadamani3125@gmail.com • +91 7045308570 • [linkedin.com/in/bhavya-damani-1009b6277](https://www.linkedin.com/in/bhavya-damani-1009b6277) • [github.com/Bhavya031205](https://github.com/Bhavya031205) • Mumbai, India

## PROFESSIONAL SUMMARY

---

Full-Stack Web Developer with practical internship experience designing and building responsive, database-backed web applications. Proficient in JavaScript, TypeScript, Next.js, and PostgreSQL across the complete development cycle — from database schema design and API development to frontend implementation and UI styling. Comfortable working independently on real projects and collaborating directly with stakeholders to deliver functional, maintainable web solutions.

## TECHNICAL SKILLS

---

**Frontend:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, Responsive Design

**Backend:** Node.js, REST APIs, Next.js API Routes, Server-Side Rendering, Static Site Generation

**Databases:** PostgreSQL, MongoDB, MySQL, Schema Design, SQL (Joins, Aggregations, Indexing)

**Tools:** Git, GitHub, VS Code, Postman, Vercel, npm

**Other Languages:** Python, Java, C/C++

## PROJECTS

---

**Rotaract Club of Virar — Organisation Web Platform** • *Next.js | PostgreSQL | TypeScript | Tailwind CSS | REST APIs*

- Rebuilt a static club website into a dynamic full-stack web application using Next.js with server-side rendering; designed the PostgreSQL schema to manage members, events, and announcements with full CRUD functionality via REST API routes.
- Built a responsive frontend with Tailwind CSS covering all screen sizes; implemented role-based page access so committee members could update content without touching code.
- Managed the entire project independently from requirement gathering and database design through to final delivery, communicating directly with club stakeholders at every stage.

**E-Commerce Web Application — Internship Project** • *HTML5 | CSS3 | JavaScript | MySQL*

- Designed and developed a multi-page e-commerce web application with product listing, search, cart, and order summary flows; wrote clean semantic HTML and modular CSS for consistent cross-browser rendering.
- Built a MySQL backend to store product catalogue, user data, and order records; wrote SQL queries for product filtering, cart calculations, and basic order history retrieval.
- Applied mobile-first design principles throughout to ensure usability across devices; structured JavaScript logic into reusable functions to keep the codebase readable and maintainable.

**ADHD Diagnostic Prediction System** • *Python | Scikit-learn | Machine Learning*

**Runner-Up — Vidyavardhini's National Product Showcase (2nd Place)**

- Built a machine learning model to predict early ADHD markers from behavioural and physiological data; awarded 2nd place at a national-level academic showcase. Demonstrates ability to take a technical problem from data to working solution end to end.

## EXPERIENCE

---

**Full-Stack Web Developer Intern** — *Rotaract Club of Virar*

Dec 2025 – Feb 2026

- Sole developer on a live web project — handled full-cycle development including database design, API development, frontend build, and handover to the organisation
- Gathered requirements directly from club leadership, translated them into technical decisions, and iterated on feedback throughout the project — practical exposure to a real client relationship

**Web Development Intern** — *Vidyavardhini's College of Engineering & Technology*

Jun 2024

- Developed a responsive e-commerce interface with HTML, CSS, JavaScript, and MySQL under professional supervision; completed deliverables within the internship timeline
- Strengthened core web fundamentals — layout, DOM manipulation, form handling, and SQL-backed data management — through hands-on project work

## EDUCATION

---

**B.E. — Artificial Intelligence & Data Science Engineering** — *VCET, Palghar*

Aug 2023 – Present

CGPA: 8.0 / 10

## **ACHIEVEMENTS**

---

- Runner-Up — Vidyavardhini's National Product Showcase for ADHD Predictive System (2nd place, institution-wide competition)
- Independently delivered a complete full-stack web project for a real organisation as the sole developer during internship
- CGPA 8.0 / 10 across a specialised AI & Data Science engineering programme
